Easter Raffle Winners

On Thursday morning Mrs Fallon asked our Year 6 children draw out the winning tickets of our Easter Raffle. The raffle was a much smaller affair this year-but thank you to everyone who contributed to this great PTA cause!

The Blog Going Forward!

We are really hoping to use our weekly blog as a way of keeping our school community in touch with each other over the coming weeks.

So, if you take photos of your children carrying out exciting tasks, sporting activities in the garden, arts and crafts, birthday photos, Easter bonnets and decorated eggs (a bit nearer the time!) book reviews and recommendations to share with others etc etc!

Use your imagination and we shall try to put together a blog each week.

Let's try to stay healthy!

We wanted to share with you the advice which has been issued by North Tyneside Council. All the children have been learning the importance of hand hygiene to protect themselves from germs. You may want to help them continue to get into good habits at home too!

Wash your Hands!

Washing your hands is one of the easiest and most effective ways to protect yourself and others from illness. During Winter, illnesses such as colds can be worsened or triggered by the weather and Norovirus is more common, so it is important to be vigilant with good hand hygiene.

Here is a quick guide to washing your hands the right way

WET your hands with cold/warm water first, then add enough soap to cover hands

LATHER your hands with the soap by rubbing them together

SCRUB all parts of your hand - in between fingers, thumbs, backs of hands, tips of fingers and fingernails and wrists

RINSE your hands and wrists with clean water

DRY hands using a clean towel/air dry them

Washing your hands should take around 20 seconds – the same time it takes to sing Happy Birthday twice!

It's especially important to wash your hands after using the toilet, blowing your nose, sneezing or coughing, touching animals/pets or cleaning their cages, before and after handling raw foods or treating wounds, before eating and when they look or feel dirty.

Hand sanitizer should be used when you don't have access to soap and water, but remember that this won't kill all germs, particularly those from Norovirus.
